

The chart displays the monthly volume of tweets for ten distinct topics over a three-year period. The blue line, representing the most active topic, shows a general upward trend with several peaks, reaching its maximum of 6 tweets in late 2017. Other topics exhibit more sporadic activity, with notable spikes in green (peaking at 3), red (peaking at 3), and purple (peaking at 3). The remaining topics (orange, cyan, yellow, magenta, brown, and grey) show lower overall activity, often dropping to zero for extended periods.
